

# Priory Radstock

Priory Radstock provides specialist support and therapeutic interventions for adults with an autistic spectrum condition (ASC).

## Introducing Priory Radstock

The service successfully transitions young adults from a variety of settings such as inpatient wards, specialist education services and forensic settings, to independent community living. The care pathways available follow a model of positive behaviour support to achieve increased independence. The focus is on social development via individual goals and regular review. The larger residence, Rookery House, offers specialist support and care by experienced staff for individuals with high functioning ASC and associated complex needs.

Service users can move through their own bespoke pathway of support to smaller facilities where they experience less supervision and more independence, whilst maintaining a strong link to the care team.

Located in Radstock, Somerset, with a wide range of amenities nearby, the service is ideally located for safe, structured steps towards greater independence.

Rookery House provides a high level of support and an enhanced residential therapeutic provision to optimise community functioning, social skills and awareness. Access to local education courses and social skill development programmes enable the individual to progress towards more independent living. Accommodation consists of self-contained flats and en-suite bedrooms. Coach House is a three bedded step down house where service users will manage the daily running of the house, access community service, shopping and budgeting. Redfield Road consists of a four bedded residential house with communal living space, and a self-contained flat, providing a step down from Rookery House or Coach House. The facilities offer the individual the opportunity to develop independent living skills in a community setting with the appropriate level of staff support. The Redfield Road flats provide an individual with independence from the main house.

## Our services

- High functioning individuals with a diagnosis of ASC and associated mental health conditions, such as obsessive compulsive disorder, depression, learning disabilities and/or behaviours that challenge
- Individuals who require intensive support and transition from specialist education into adult services
- Individuals who transition from a highly supported setting to a less supported placement, including those leaving forensic or secure services and leaving out of area placements
- Individuals who are overcoming difficulties associated with their diagnosis
- Individuals who will benefit from a structured environment and boundaries to develop social and life skills

## Multidisciplinary team (MDT)

The MDT is committed to enabling service users to achieve their maximum potential. Care is individualised through the use of treatment plans and milestones. Goals are agreed from admission, which aim to engage the service user, supporting them on their pathway to appropriate and agreed outcomes. The team also aim to provide a variety of meaningful activity per week to each service user.

The MDT includes:

- Consultant Psychiatrist
- Positive behavioural support
- Autism specialist team
- Activities co-ordinator

The team also benefits from a progressive training programme towards achieving a National Diploma Award. The staff team are all trained to at least level two or three and are committed to providing a safe environment in which service users can explore freedom of choice and expression, whilst making decisions associated with everyday living.

## Achieving positive outcomes

By encouraging people to take control and have belief in their potential, we can make positive outcomes a reality for everyone, regardless of age or presumed ability.

We create pathways that support individuals through residential to community living, delivering measurable results for both local authorities and the people who use our services. This, paired with our personalisation agenda, enables us to help the people we support to lead fulfilled, independent lives. By working together, we can make a real and lasting difference.

## Admissions and referrals

At Priory Adult Care, we can offer advice about accessing benefits and funding if appropriate.

We support people on how best to spend an individual budget or direct payment to make sure the people we support can live the life they want.

Referrals can be made through:

- The individual's social services department management team or, if relevant, their local health authority
- By the individual (or an appropriate adult acting on their behalf) who wishes to use direct payment, individual budget, or who is self-financing.
